

DECREASE DOWN TIME. INCREASE PRODUCTIVITY.

MIDDLESEX GASES & TECHNOLOGIES

CYLINDER BAR-CODING SYSTEM

Full visibility in
your cylinders.
Full confidence in
your business.

With tens of thousands of high pressure cylinders in our inventory and distributed to customers across New England, keeping track of cylinders is no small task.

Middlesex Gases & Technologies has recently implemented Advanced Cylinder Management (ACM) from Computers Unlimited, becoming the area's only gas distributor utilizing this latest generation of digital bar code tracking technology.

With our handheld scanners, Middlesex Gases can improve how we do business and better serve our customers. ACM is just one example of how new technology benefits all by saving time and money.

Customer Benefits:

- Improved cylinder inventory control and traceability
- Reduce lost or stolen cylinders
- Improved account information
- Detailed cylinder ageing reports
- No need to internally track cylinders
- Optimized cylinder stocking levels
- Digital signed proof of delivery
- Flag cylinders after 30,60,90 days
